

Colour trends for every style... Which is yours?

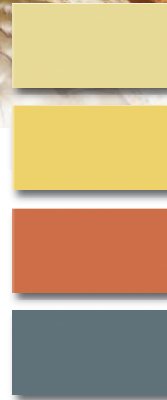

Contemporary

Simplicity, subtle sophistication, texture and clean lines define contemporary style. By focusing on colour, space and shape, contemporary interiors are sleek, fresh and very now. Contemporary interiors often include elements from other styles resulting in an interesting union of colour and textures.

Traditional

Traditional style exudes timeless elegance. The typical traditionalist loves ornate detail and rich materials with lots of texture. Moldings, raised paneled doors, hardwood floors, marble and silks are just a few of the elements found in traditional interiors.

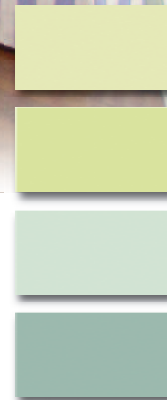

Transitional

Transitional design is a streamlined version of traditional design. Transitional combines clean crisp lines & spaciousness with some of the ornate details and rich materials from traditional design. The result is a clean & crisp timeless interior.

Country

Country designs are relaxed, simple and all about comfort. Interiors include natural textures, colors and rustic home accessories. The finishing touches include friendly and pretty touches such as throws, cushions, quilts and wicker accessories.

Decorators Corner can help you choose the best colour combination, whatever your style.
